AKHIL

Python Fullstack Developer

Profile

I am an enthusiastic and detail-oriented Python Full Stack Developer with a solid foundation in both front-end and back-end technologies, including HTML, CSS, JavaScript, and Django. To leverage coding skills, passion for web development, and problem-solving abilities to contribute to innovative web solutions.

Skills

- Backend: Python, Django
- Frontend: React.js, JavaScript, Bootstrap, HTML, CSS.
- Database: MySQL
- Database Management: PhpMyAdmin.
- IDE: VS Code, Sublime.
- Text Tools: Postman, Axios, Json.
- Operating System: Windows
- Good Communication Skills.
- Problem Solving
- Teamwork

Experience

During my internship at Mashup Stack, I played a pivotal role in advancing full-stack development, specializing in Python, Django, and React. My expertise extends to REST APIs, database management, and deployment processes vital for building robust web applications. I possess strong problem-solving skills and excel in collaborative environments, contributing to the success of various projects.

PROJECTS

1. Movie Ticket Booking Website

Developed an innovative Movie Ticket Management System using Django and React.js to enhance the movie-going experience for both administrators and users.

- **Admin Panel:** Enabled seamless movie and user management with CRUD operations.
- **User Panel:** Provided an intuitive interface for logging in, signing up, and booking tickets.
- **PDF Tickets:** Implemented QR code-enabled, downloadable PDF tickets for convenience.
- **Payments:** Integrated Razorpay for secure payment processing and automatic email confirmations.

2. Medical Store Web Application

Developed a Medical Store Management System using Django and MySQL to streamline inventory and sales management.

- **User-Friendly Signup/Login:** Simplified onboarding with an intuitive signup/login system.
- **Medicine Management:** Comprehensive features to add, edit, search, and remove medicines from inventory.
- **User Interface:** Intuitive design for easy navigation, enhancing usability and productivity for all users.

3. Train Ticket Booking Web Application

- Developed a web app using Django (backend) and React (frontend) for train ticket booking and management.
- Enabled users to search schedules, book tickets, and manage bookings through an intuitive interface.
- Integrated real-time updates for train schedules and seat availability.
- Implemented secure user registration and authentication.
- Integrated a secure payment gateway for transactions.
- Provided features for managing booking history, cancellations, and e-ticket downloads.
- Designed an admin panel for managing train schedules and user queries.
-

DECLARATION

I am dedicated to leveraging my skills and experience in Python full stack development to contribute effectively to innovative projects. With a commitment to continuous learning and collaboration, I aim to drive positive impact and deliver exceptional results in a dynamic work environment.
